

2023 Workshop for Global Civil Engineers

"The Role of Civil Engineering in Achieving the SDGs"

This Workshop aims to increase participants' awareness of sustainable development and the Sustainable Development Goals (SDGs), and to challenge them to think about how civil engineering (CE) can contribute to achieving the SDGs and realizing a more sustainable world.

Fundamental knowledge about sustainable development and the SDGs will be introduced, and participants will work together to explore how they can apply that knowledge to the civil engineering field. People of all ages, nationalities, and genders are welcome - all you need is a desire to make the world a more sustainable place. We are looking forward to seeing you there!

**15 September 2023
(Friday)**

3:30 p.m. - 6:00 p.m.

**Reception Hall,
2F Gakushikaikan,
Higashi-Hiroshima Campus,
Hiroshima University**

Capacity: 50

Moderator / WS Speaker

**Prof.
Michael Henry**
Shibaura Institute of Technology

Facilitators

**Prof.
Yoshihiro Okumura**
Kansai University

**Assoc. Prof.
Ji Dang**
Saitama University

Networking Reception

We are going to hold a Networking Reception after the Workshop. You may engage with various participants while enjoying light meals and soft drinks.
